

Postdoctoral research associate in Immunology at the Francis Crick Institute and King's College London

We seek to recruit a highly motivated postdoctoral research associate to work in the lab of Dr Patricia Barral based at the Francis Crick Institute in London (UK). <https://www.crick.ac.uk/research/labs/patricia-barral>

Dr Barral's research program aims to understand the cellular mechanisms that initiate immune responses, with a particular emphasis on studying the biology and function of unconventional T cells in health and disease. The post-holder will use in vivo models and imaging techniques, to uncover the features and distribution of unconventional T cells within different tissues and to explore how these are altered in disease.

Candidates should have a PhD degree (or a PhD near completion) in Biological/Biomedical sciences and a strong background in Immunology. The post holder will be expected to have extensive research experience and a publication track record appropriate for the level of experience. Knowledge and experience in molecular biology, animal work, imaging techniques and flow-cytometry will be an advantage.

For an informal discussion of the post, please contact Dr Patricia Barral via email at patricia.barral@kcl.ac.uk quoting job reference: **008148**. For more information about the post and instructions to apply:
