

## Post-doctoral Position Offer

The research team of HIV Immunopathology and Cellular Immunology, lead by Dr. Montserrat Plana, within the AIDS Research Group from Institut d'Investigacions Biomèdiques August Pi i Sunyer (IDIBAPS) in Barcelona, is searching a post-doctoral scientist. The candidate will be involved mainly in research projects concerning both *in vitro* studies of a new developed HIV vaccine based on mRNA, looking at the interactions of immunogen and carriers with dendritic cells (DCs) and the induction of HIV-specific T cell responses, as well as in studies of therapeutic vaccines planned.

The successful candidate will be also involved in others immunopathology research projects of the group and will participate in all scientific activities done.

### Profile:

Biomedical doctoral thesis with proved experience in the fields of immunology, cellular and molecular biology, cell culture, and flow cytometry is needed.

Previous experience in the study of DCs and knowledge of cellular therapy and nanovaccines will be desirable.

Initiative, previous publications, skills for teamwork, motivation for translational research and good knowledge of English will be considered.

**Duration:** one year, with possibility of extension until the end of 2021.

The candidate could also be a future candidate for a competitive call for postdoctoral contracts.

### Further information and applications:

For further information about the work in the group visit

<http://www.idibaps.org/aidsresearch/teams/team2/team2.html>

### Contact:

Applications should include a complete CV, a motivation letter and two recommendation letters.

Send **before August 15<sup>th</sup>** to Dra. Montserrat Plana ([MPLANA@clinic.cat](mailto:MPLANA@clinic.cat)) indicating POST-DOC in the subject of the mail.
