10:55am to 6:30pm CET

£ **Free for all** 📍 **Online**

About this webinar

Join the 14th Jenner Glycobiology and Medicine Symposium, the first and main international multidisciplinary conference set up to examine the relevance of glycobiology to immunology, medicine and clinical practice. This edition will provide an international forum for researchers to disseminate current leading-edge studies in both novel and classic fields of glycobiology, glycoimmunology and glycomedicine.

The programme will focus on glycosylation and glycan recognition, glycosylation in innate and adaptive immunity, translational glycobiology and a plenary session provided by Sir Greg Winter, Nobel Laureate.

For further queries, contact Roisin O'Flaherty: Roisin.OFlaherty@mu.ie

Wed 27 Oct 2021, from 10:55am to 6:30pm CET
