

DEMYSIFYING LONG COVID

INTERNATIONAL CONFERENCE 2023

HYBRID MEETING | 7-9 DECEMBER 2023 | MADRID, SPAIN

Long COVID | a multisystem condition posing a significant burden on individuals and public health.

The carefully curated program kicks off with a refresher session on the **basic facts of Long COVID**.

What do we already know about persistence and inflammation?

Explore the prevalence, incidence, and risk factors of long COVID, and discuss how we define the syndrome and clusters of symptoms. Assess the **global impact** of long COVID before entering the welcome reception. Enjoy this **dedicated network time** to connect with KOIs and discuss your learnings from the first day.

Day two starts with a deep dive into the **pathogenesis of Long COVID!**

What are the current hypotheses?

Hear from leading experts and the field's rising stars as they dissect viral persistence, vascular dysfunction, neuropathogenesis, and more!

Time for some lunch and caffeine hit before the afternoon's practical sessions on **clinical management**.

What are the current treatment options?

What about rehab and MPE management? Where do we stand with long COVID in pediatric and adolescent populations? Discover the latest on autonomic dysfunction, neurological, cardiovascular, and respiratory symptoms, and more.

Then it's time to enjoy the **official welcome reception!**

Meet your mentors in a relaxed setting and take a **stroll around the poster viewing gallery!**

The final day begins by looking to the future – what's on the horizon for treatment and prevention? Review the clinical data, vaccine interactions, the COVID-OUT study, and the Paxlovid Trial.

The conference concludes with an insightful session looking at the **impact of Long COVID** on society. How has it evolved?

Three days of cutting-edge science concludes with a lively roundtable discussion featuring clinical, health economics, policy, research, and patient perspectives!

Program Chairs

Daniel Kuritzkes, MD
Brigham and Women's Hospital,
Harvard Medical School,
United States

Monica Gandhi, MD, MPH
University of California,
San Francisco,
United States

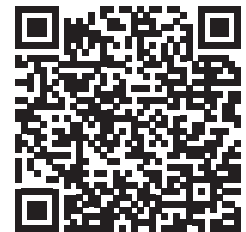

Dominique Salmon, MD, PhD
Paris Descartes University,
France

Roger Paredes, MD, PhD
Hospital Germans Trias & irsiCaixa,
Spain
